Folio Flow Catalogue

Every Folio flow in the tenant: what it does, how it starts, its state and its package

National Information Technology Development Agency · Office of the Director-General/CEO · DGO Digital Operations

Document	Folio Flow Catalogue
Reference	NITDA-FOLIO-HO-3.1
Version	1.0
Date	20 October 2026
Classification	Internal
Built from	Repository dgoeaa/ECM_DOCS_DEV, commit c6e49d73
Build	v2026.10.20-1 (Workspace and Portal packages)
Register of record	Version 1.12.87: 0 open, 122 closed

Every flow Folio runs in the Power Automate tenant, read from the tenant on 20 Oct 2026, 00:09 UTC: 43 flows, 42 running. A package is the definition a flow runs, released and recorded by its fingerprint; each is in *3.3 Flow Packages*, in the folder of its group, and described in *3.2 Folio Flow Package Guide*. The last run of each flow, as read, is in *1.2 Folio Registers*, sheet Flows.

Group	Flows	Running	Packages in
Folio Workspace	15	15	3.3 Flow Packages / 1 Folio Workspace
Document Portal	7	7	3.3 Flow Packages / 2 Document Portal
Scheduled and event-driven	6	5	3.3 Flow Packages / 3 Scheduled and Event-Driven
Correspondence Mailer	7	7	3.3 Flow Packages / 4 Correspondence Mailer
Governance flow registry	8	8	None: run as built
Total	**43**	**42**	

Folio Workspace

The flows the Workspace calls: loading the registry, assigning work, the actions on a record, sign-in, administration and e-mail.

Flow	What it does	Starts on	State
IP_FETCH_ALL_BOOTSTRAP Package: FETCH_ALL__IP_FETCH_ALL_BOOTSTRAP__b79e6707.paste.json	Loads an officer's working data when the Workspace opens: documents, tasks, approvals, reference lists and the registry inbox, scoped to the officer's role.	HTTP request	Running
IP_Get_Docs_Endpoint Package: GET_DOCS__IP_Get_Docs_Endpoint__28f6e62a.paste.json	Returns documents and activities for the Workspace's document views.	HTTP request	Running
IP_Reference_Data_Endpoint Package: REFERENCE_DATA__IP_Reference_Data_Endpoint__9a4dea8e.paste.json	Returns the reference lists the Workspace's forms use.	HTTP request	Running
IP_Retrieve_Email_Attachment_Endpoint Package: FETCH_EMAIL_ATTACHMENTS__IP_Retrieve_Email_Attachment_Endpoint__5bc87cf3.paste.json	Retrieves the attachments of e-mails in the registry inbox.	HTTP request	Running
IP_Dynamic_Global_Actions_Endpoint Package: DYNAMIC_ACTIONS__IP_Dynamic_Global_Actions_Endpoint__31c0aaf0.paste.json	Carries out governed changes to records: task updates, dispatch, comments, reminders and related actions.	HTTP request	Running

Flow	What it does	Starts on	State
Single_Task_Assignment Package: SINGLE_ASSIGNMENT__Single_Task_Assignment__3caf9458.paste.json	Assigns a document to an officer as a task and e-mails the assignment notice. *Last run 10 Oct 2026 01:30 UTC: it created TASK-2026-00002 and sent the assignment notice, but is marked Failed because its reply to the caller timed out. That definition was replaced at 16:22 UTC the same day; the current one has not run since. Check the run history after the first assignment after go-live.*	HTTP request	Running
BULK OPS DATA RETRIEVAL HTTP Package: BULK_ASSIGNMENT__BULK_OPS_DATA_RETRIEVAL_HTTP__5aab9e61.paste.json	Assigns several documents in one operation and reports any that failed.	HTTP request	Running
IP_Create__Task__for_received_Email_Endpoint Package: EMAIL_RELATED_TASK__IP_Create_Task_for_received_Email_Endpoint__ab1a3555.paste.json	Raises a task from an e-mail received in the registry inbox.	HTTP request	Running
AI_Document_Processing Package: AI_DOC_ANALYSIS__AI_Document_Processing__fefa43c6.paste.json	AI analysis of documents, e-mails and chat. AI is switched off in the Workspace by decision (ITEM-88). *Runs only when AI analysis is switched on in the Workspace; it is off by decision (ITEM-88). Last run 8 Oct 2026, cancelled.*	HTTP request	Running
IP_OTP_VERIFY Package: OTP_VERIFY__IP_OTP_VERIFY__4dbe6dde.paste.json	Verifies a staff member's sign-in code and issues the session proof every governed call carries.	HTTP request	Running
IP_OTP_GENERATE Package: OTP_GENERATE__IP_OTP_GENERATE__e5632336.paste.json	Sends a one-time sign-in code to a staff member's work e-mail.	HTTP request	Running
IP_User_Admin_Endpoint Package: USER_ADMIN__IP_User_Admin_Endpoint__e3e5c825.paste.json	Adds, changes and disables staff access and roles (User Administration).	HTTP request	Running
IP_Activity_Lifecycle_Endpoint Package: ACTIVITY_LIFECYCLE__IP_Activity_Lifecycle_Endpoint__b4db02d8.paste.json	Records activities and routes them to SIWES, NYSC or the archive.	HTTP request	Running
IP_SCAN_INTAKE Package: SCAN_INTAKE__IP_SCAN_INTAKE__5504d7f9.paste.json	Registers a document deposited at the registry counter from the Workspace's Scan Intake screen.	HTTP request	Running
IP_SEND_EMAIL Package: EMAIL__IP_SEND_EMAIL__df59a69f.paste.json	Sends e-mail for the Workspace (staff notices, responses dispatched through the Correspondence Email Desk) and writes a delivery receipt.	HTTP request	Running

Document Portal

The flows the public Document Portal calls: submissions, uploads, status checks, verification and support.

Flow	What it does	Starts on	State
CG_Submission_Endpoint Package: SUBMISSION__CG_Submission_Endpoint__de9ef13b.paste.json	Receives a submission from the public, issues its NITDA-YYYY-NNNNN reference and e-mails the acknowledgement.	HTTP request	Running
CG_Upload_Endpoint Package: UPLOAD__CG_Upload_Endpoint__df82e331.paste.json	Stores the attachments of a submission, refusing any upload without a valid ticket.	HTTP request	Running
CG_Portal_Status_Check_Endpoint Package: STATUS__CG_Portal_Status_Check_Endpoint__60042a2e.paste.json	Answers a submitter's tracking request with the record's current status.	HTTP request	Running
CG_Portal_Support_Endpoint Package: SUPPORT__CG_Portal_Support_Endpoint__4873c936.paste.json	Opens a support case (CASE-XXXXXX) from the Portal and links it to the record it concerns.	HTTP request	Running
CG_Portal_Writeback_Endpoint Package: WRITEBACK__CG_Portal_Writeback_Endpoint__bde13d27.paste.json	Adds a submitter's note to their record and its status timeline.	HTTP request	Running
CG_Portal_Verification_Endpoint Package: VERIFY__CG_Portal_Verification_Endpoint__ba47f79b.paste.json	Sends a verification code to a submitter's e-mail address.	HTTP request	Running
CG_Portal_Verification_Confirmation_Endpoint Package: VERIFY_CONFIRM__CG_Portal_Verification_Confirmation_Endpoint__f96e3448.paste.json	Checks the verification code and locks out repeated wrong attempts.	HTTP request	Running

Scheduled and event-driven

The flows that start on a schedule, or when a file or message arrives, rather than on a call from an application.

Flow	What it does	Starts on	State
CG_Registry_Status_Notifier Package: NOKEY__CG_Registry_Status_Notifier__8ebf6001.paste.json	When a Portal record's status changes, e-mails the submitter the outcome.	SharePoint item changed	Running
CG_Portal_Daily_Sweep Package: NOKEY__CG_Portal_Daily_Sweep__f12aec6d.paste.json	Daily housekeeping of Portal records, recorded in telemetry.	Schedule: daily at 08:00	Running

Flow	What it does	Starts on	State
AUTO_SCHEDULED_SWEEP Package: NOKEY__AUTO_SCHEDULED_SWEEP__8c19b45c.paste.json	Working days at 08:45 WAT: one digest per officer of unacknowledged and overdue tasks, task reminders, support-case notices and alerts for messages that could not be delivered. Staff digests go to the registry mailbox until staff notifications are switched on.	Schedule: 08:45, Monday to Friday (WAT)	Running
Folio_Incoming_Correspondence_Scan_Processing_Flow Package: NOKEY__Folio_Incoming_Correspondence_Scan_Processing_Flow__197527c8.paste.json	Turns each scan saved to /E-DOCUMENT STATION into a registry record and notifies dgs@nitda.gov.ng ("New E-Scan").	OneDrive file created	Running
Folio_Failure_Watch Package: NOKEY__Folio_Failure_Watch__c38bfeaa.paste.json	Hourly on working days: reports newly failed notices to the registry and records the failure count per group for System Health.	Schedule: hourly 07:00-18:00, Monday to Friday (WAT)	Running
DGSO INCOMING AI PROCESSING	The former library intake. Replaced by the scan processing flow and turned off by design on 16 October 2026 (ITEM-80). *Off by design since 16 Oct 2026 (ITEM-80).*	OneDrive file created	Off by design

Correspondence Mailer

The seven flows behind the DGO Correspondence Mailer, installed from their own import packages.

Flow	What it does	Starts on	State
DGO_MAIL_AUTH Package: DGO_MAIL_AUTH.zip	Operator sign-in: codes, 12-hour sessions and the operator list.	HTTP request	Running
DGO_MAIL_DATA Package: DGO_MAIL_DATA.zip	Mailings, their results and the Activity reports.	HTTP request	Running
DGO_MAIL_DIRECTORY Package: DGO_MAIL_DIRECTORY.zip	The directory of institutions and addressees.	HTTP request	Running
DGO_MAIL_LOG Package: DGO_MAIL_LOG.zip	The send log and its export.	HTTP request	Running
DGO_MAIL_PROVISION Package: DGO_MAIL_PROVISION.zip	Creates the Mailer's SharePoint lists and library.	HTTP request	Running
DGO_MAIL_SEND Package: DGO_MAIL_SEND.zip	Sends each personalised letter with its attachments.	HTTP request	Running

Flow	What it does	Starts on	State
DGO_MAIL_TEMPLATES Package: DGO_MAIL_TEMPLATES.zip	Letter templates and the signatory.	HTTP request	Running

Governance flow registry

The registry of the Agency's HTTP flows and the flows that maintain it. They run as built in the tenant and have no package.

Flow	What it does	Starts on	State
01 - GOV - Provision HTTP Flow Registry	Creates and validates the seven HTTP flow registry lists, their settings and views, and e-mails a provisioning report.	Manual (Run button)	Running
02 - GOV - Register HTTP Flow Truth	Records a flow's contract and definition fingerprint in the registry.	HTTP request	Running
03 - GOV - Record HTTP Flow Execution	Writes a flow run to the execution ledger. *Runs on request; not yet needed.*	HTTP request	Running
04 - GOV - Audit HTTP Flow Registry	Nightly audit of the registry for stale, failing or non-compliant flows.	Schedule: daily at 02:00 (WAT)	Running
05 - GOV - Retire HTTP Flow	Retires a flow from the registry. *Runs on request; not yet needed.*	HTTP request	Running
06 - GOV - Registry Exception Notification	Hourly: e-mails open governance exceptions.	Schedule: hourly	Running
07 - GOV - Consumer HTTP Self-Registration Template	The template a consuming system uses to register itself with the registry. *A template; runs on request; not yet needed.*	HTTP request	Running
08 - GOV - Discover and Register HTTP Consumers	Nightly discovery and registration of the systems that call HTTP flows.	Schedule: daily at 03:00	Running
